Final Project:

Thought Note:

1. *Header:* I have used gradient color in the background of the header section or I have divided the header section into two parts, in the first section I have company's logo or search bar or login button and cart button and in the second section I have added dropdowns related to the product.

2. *Footer:* All links in these footers are active. When you click on those links, a new page will open and the background color of the footer is linear gradient.

• *Home page:* ,in the home page header and footer are loaded with load function (JavaScript) In home page I have used banner image or feature product with card slider and header and footer to add by (load function) and this is fully responsive.

- ***Login Page:***
  header and footer are loaded with load function (JavaScript) An image has been used in the background of the login page and if you put (admin@admin.com) or password (123456) you will get an alert of login success, if you put wrong email and password you will get an alert message of login failed.

- ***Contact Us:*** In contact us page, header and footer are loaded with load function (JavaScript) and an image related to business is used which contains 6 colmn or contact us form contains 6 colmn.

- ***Cart Page:*** In Cart Page header and footer are loaded with load function (JavaScript) In Cart page background linear gradient color is used In cart page first part items in cart and second part checkout total amount
